Base jumping is an extreme sport, the first jumps were made by Carl Boenish, an American woman. It is not easy for beginners because you need a hard training. In the training you learn how you can skydive fast to open and how you react when you have a problem with the skydive. But even though you have advanced how you flip, rolls... make.

That was not enough for you than can you look of the side:

What is Base Jumping?

When it comes to the base jumping I can say that base jumping is very impressive and you became often a rucher kick. Apart from that base jumping is a sport for people who are low sports people. Some people make objects spring some people make roll, flips... in the jump and than they trigger the skydive. But even though low height make for a lot of jumper the base-jump-irritant.
