

The journey of the majestic plastic bag

The journey of our plastic bag starts in the supermarket.

And if it was not disposed yet, it still floats there today.

The wind carries it through the streets and parks of the city.

Finally our plastic bag reaches "Plastic Island" in the pacific ocean.

It lands in a river and swims on the water.

In the ocean it is a dangerous object for fish, dolphins or turtles.

It arrives the big wide ocean.
