

The headphones stand

geschrieben von
Kurt Domancich

We an idea to Bild a headphone stand out of wood so we decided to go to the forest to find wood for our project. I was so happy and excited to start this project.

My dad told me to wear the right clouting for the forest. We got ready to head to the forest. During our walk in the forest we found 2 sticks, so we had decided to build 2 swords. We played a game to fight each other it was very funny. After a while we decided to continue to find the perfect wood. during our walk we found a lot of nice wood, but we decided to take the best. After some time of walking we headed back home we

were exhausted but we continued so we went to the basement cellar. To start building our headphones stand we set down to gather and drafted the headphone stand how it would look like on a piece of paper. After the sketch was finished, we decided to start building. We did not have all the tools to cut the wood according to the size we planned. so we use a drillier it was way harder but we manage to make it work I was so happy I ran back up to the apartment and in my room I tested it and it work I started the gaming after I stop gaming I put the headphones on the stand.
